

UDA PEOPLE

CI/CD ADOPTION

CONTINUOUS INTEGRATION

With the growth rate our Uda People project would attain, we need to ship features to our clients faster to build trust which will help protect our revenue and possibly increase it.

The Uda People will release features at fast pace and it will be tested and audited on same pace so as to avoid cost.

CONTINUOUS DEPLOYMENT

As our engineers ship features, the continuous delivery would ensure a trusted repeatable process of making these features available and fits the resources used to demands of the client which will avoid some cost for us.

Adoption Benefits

Reduce Cost:

Less developer time on issues from new developer code and automated removal of extraneous infrastructure

Avoid cost:

Less bugs in production and less time in testing and detection of security vulnerabilities.

Adoption Benefits

Increase revenue:

New value-generating features released more quickly and ships in less time

Protect revenue:

Reduced downtime from a deploy-related crash or major bug as rollback mechanism is automated.

THANK YOU
